-

Install the Application

-he application consists of tmo modules that must be installed:

- Net Monitor for Employees Professional Console
- Net Monitor for Employees Agent

Installing the Net Monitor for Employees Agent

-he "Net Monitor for Employees Agent" must be installed on all remote computers that you want to monitor. To do this, you must have administrative privileges.

http://support.microsoft.com/kb/971513

want to use for accessing the console. If more users use the same computer, they must all login to the computer using their accounts and set their own password for the console.

Using the Console

Adding Remote Computers in the Console

To be able to monitor the remote computers, you must first add them to the console. You can add computers in three ways:

¶

Some of those actions can be used as restrictions - they are automatically started when remote user logs in:
